WORKSHOP CATALOGUE

CODE	TITLE	DESCRIPTION	AM	PM	PRESENTER
A01	Indigenous Health Pre-Admissions Workshop	Take part in a pre-admissions workshop for Indigenous students interested in the MD program. This workshop is inclusive of traditional health teachings, pre-admission requirements, role models and hands-on activities.	14	15	Val Arnault Rayyann Haque HLTH 2332
A02	Virtual Health Hub Demonstration and Q&A	In response to an increasing demand for timely access to quality healthcare for rural and remote populations, governments and healthcare institutions are investing in virtual care solutions to address the challenge. Robotics has occupied a role in the provision of virtual care, and Saskatchewan is a global leader in the implementation of some of the most advanced technology including remote presence robotics and telerobotic ultrasonography. With the establishment of the Virtual Health Hub, Saskatchewan will pioneer an innovative healthcare delivery model to provide real time access to essential healthcare services for populations across the country.	14	15	TBC HLTH 2330
A03	Health Science Simulation Room Tours	Take a tour of the Clinical Learning Resource Centre (CLRC) a vital space used for training all health science disciplines. These tours will expose you to the learn spaces, mannequins, and simulation staff that health science students work with to learn the fundamentals of clinical care.	18	0	Salih Nela CLRC
A04	Rural Medicine	Join staff and students from our Rural Medicine team to understand the opportunities and benefits of completing medical training in rural/regional communities across Saskatchewan. The College of Medicine has rural and regional training sites across the province with unique learning opportunities for medical students. Joining this workshop is your chance to gain early exposure to what training, living, and practicing Medicine in a rural/regional site can look like.	31	35	Bailey Edelman Delilah Cerniuk HLTH E1150

CODE	TITLE	DESCRIPTION	AM	PM	PRESENTER
A05	See your beating heart live in your body- POCUS station	Students will get a hands-on demonstration of Point-of-Care Ultrasound (POCUS). Meet one of our faculty members and students and learn about the new two-year Master of Physician Assistant Studies (MPAS) program. Discover what it's like to become a physician assistant!	18	20	Dr. Dakota Van Dijk Dr. Muhammad Khan HLTH 2334
A06	Family Medicine	Family doctors provide high quality comprehensive health care to the communities they serve. Family doctors are front-line physicians who are generally the first health practitioner that patients seek out when health issues arise. Working with interprofessional teams, they provide comprehensive care to their patients - often over the entire life cycle. No day is the same in a full-scope family practice! Family physicians are versatile. They adapt and change over time, along with the family doctors' interests and preferences. Family medicine is a 'choose your own adventure'! You have the flexibility to build your practice in many ways: Obstetrics, Emergency Medicine, Sports Medicine, Rural and Remote, Geriatrics, Sleep Medicine, Hospitalist, Palliative Care, Addictions Medicine... it's up to you!	32	35	TBC HLTH E1130
A07	What's Living in There? Exploring Microbes, Cells, and Your DNA	What can you see in a drop of yogurt? What lives between your teeth? And can you actually see your own DNA? In this hands-on workshop, students will explore the microscopic world and try out some of the techniques used in biomedical science. Students will use microscopes to observe microorganisms in yogurt, prepare a cheek-tooth sample to see cells from their own mouths, and isolate their own DNA using everyday materials. Along the way, we'll explore how scientists use microscopes, cells, and DNA to understand the human body and investigate disease. The workshop will also introduce students to biomedical science as a career, including what biomedical scientists do and the different educational paths that can lead to careers in health research, medicine, biotechnology, and related fields. No previous laboratory experience is required.	35	40	Vincent Maranda B204
B01	Veterinary Medicine	Have you considered a future career working with animals and improving animal health? Come visit us at the Western College of Veterinary Medicine to explore a career in veterinary medicine. Students will have a chance to take part in hands-on activities in our state-of-the-art simulation centre and ask questions about the education path.	23	25	Heather Mandeville 2304 WCVM This workshop takes place at a location approximately 10-15 minutes' walk from the hub.
