

SAMPLE Workshop Catalogue

Code	Title	Description	AM	PM	Presenters
A01	<i>Nursing Skills in Action</i>	What do nurses REALLY do? Learn about and practice common nursing skills such as blood pressure (BP) measurement, patient assessment, wound dressing and Surgical Sally. Nursing students and graduates will work with you and be available to share stories and answer questions.	15	15	Trudy Unger Health GB10
A02	<i>Medicine</i>	The Medicine workshop will give students the opportunity to have hands-on activities with current medical students. Activities that are planned include suturing, looking at x-rays and anatomical structures, using medical instruments, and working with a simulated patient (based on availability). In addition, medical students will be able to share their experiences and answer questions in terms of how they decided to become a doctor and steps required to gain admission to the M.D. Program.	15	15	Sherrill Bueckert Room E2334 HS and the E-wing Atrium
B01	<i>Nutrition & Dietetics</i>	Dietetics is the profession that translates the science of nutrition into practice to promote health. Find out how you can become a registered dietitian and learn about excellent career opportunities in clinical dietetics, food service administration and public health nutrition, among others. Taste some culturally diverse foods, learn about nutrition assessment tools, hear about the unique practicum program and try your hand at a myth-busting Q&A session.	25		Katherine Ford G29 Thorvaldson
B02	<i>Measuring muscle strength and power</i>	In this workshop you will learn how to measure muscle strength and power in humans using a dynamometer machine. You will also have the opportunity to volunteer as the test subject.	15		Dr. Jon Farthing PAC 353, 3 rd floor Kin Labs
B03	<i>Pregnancy and Gynecology</i>	Have the chance to do a simulated, hands-on delivery of a baby. Test your skills at checking a cervix. Practice doing a pap smear. See what different forms of birth control look like and find out how they work.	20		Dr. Melissa Mirosh Health C101 (Lower MUMPS)

C01	Biomedical Sciences - A great gateway to health and related professions	In this workshop, we seek to spark your interests in our undergraduate programs by scientific demonstrations in Biochemistry [BIOC], Microbiology and Immunology [MCIM], Physiology and Pharmacology [PHPY], and exploration of human body models from Anatomy and Cell Biology [ACB].		25	Cindy Wruck E Wing, outside 2D40 lab, HS
C02	Veterinary Medicine	Do you like animals? Are you interested in being a veterinarian? In this workshop, the Western College of Veterinary Medicine will provide you with information on what it takes to earn a four-year Doctor of Veterinary Medicine (DVM) degree. Through hands-on activities in our new simulation lab, you will find out more about what veterinary medicine is all about.		20	Heather Mandeville WCVm room 2304
C03	Pharmacy	Consider joining the health care team as a pharmacist! Come and see how pharmacy is changing. Pharmacists are taking on expanded roles as medication management experts to prevent adverse drug events and provide optimal drug therapy outcomes for their patients. Pharmacy practice includes a patient-centered care approach allowing pharmacists to deliver expanded services that range from not only providing safe and effective medication but also patient education, prescribing and adapting medications, interpreting and ordering laboratory tests, medication management and reconciliation, and the administration of injections. Find out how pharmacists, as medication experts, have an important role to play as vital members of the health care team.		25	Donna Michasiw E2130, HSB

*These workshops were offered during the last Discovery Day hosted at USaskatchewan, the offer for this year might change significantly.
