SELECTION CRITERIA AND CATEGORIES

Canadian Medical Hall of Fame Laureates are Canadian citizens whose outstanding leadership, integrity and contributions to medicine and the health sciences, in Canada or abroad, have led to extraordinary improvements in human health.

Their work may be a single meritorious contribution or a lifetime of superior accomplishments. Pioneers in their field, they are role models who inspire young Canadians to pursue careers in the health sciences.

Laureates include worthy nominees from a variety of disciplines and from many professions and roles including doctors, researchers, nurses, dentists, pharmacists, policy makers - to name only a few. Nominations of Canadians, living or posthumous, who meet the criteria from the many aspects of health are encouraged.

Up to six individuals may be selected for induction annually; only one individual may be inducted posthumously each year.

Canadian citizens from across health professions within Canada and across the globe may be recognized for their work in one or more of the following categories:

- ♦ **Leadership in building excellence in health for Canadians and the world**
- ♦ **Leadership in health promotion, illness prevention and care**
- ♦ **Leadership in research with national and international recognition for a scientific contribution**
